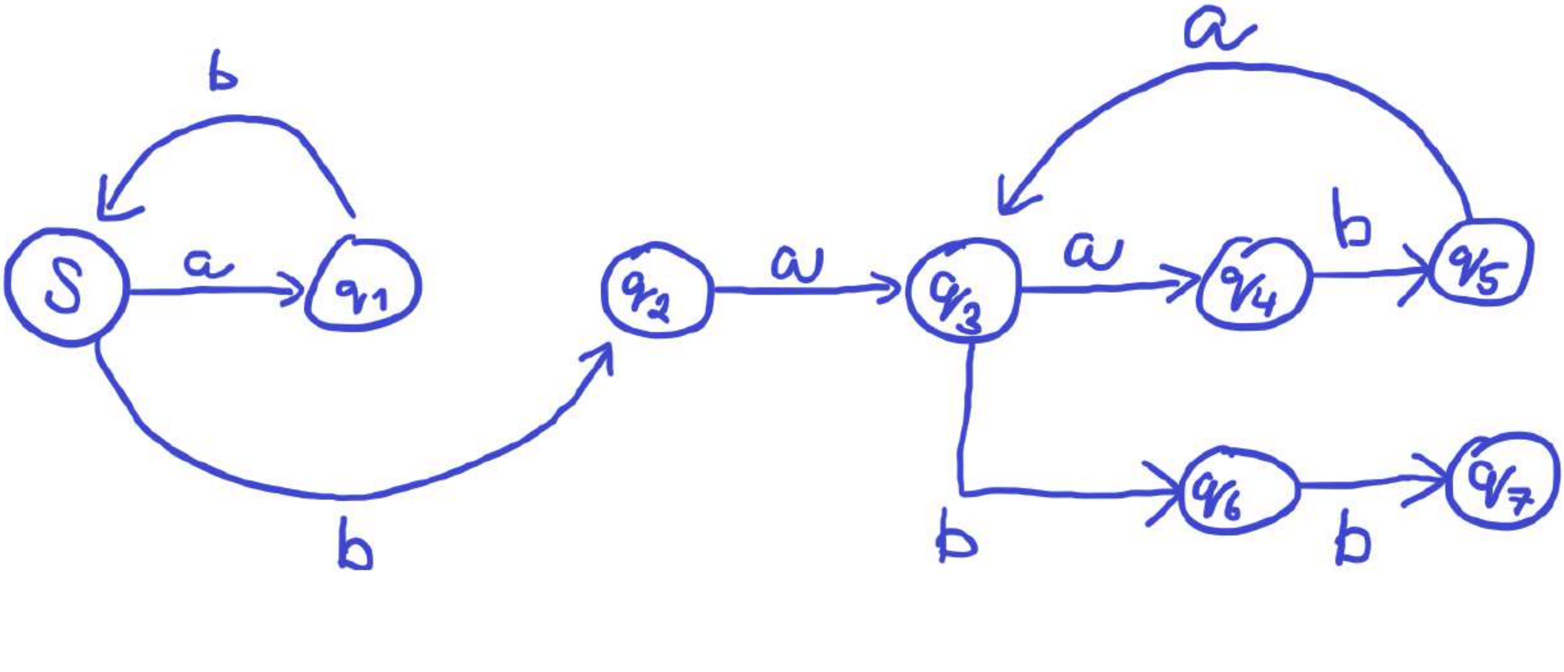
2. Construct a dfa that accepts the language generated by the grammar

$$S \to abS \mid A,$$

$$A \to baB,$$

$$B \to aA \mid bb.$$



3. Find a regular grammar that generates the language $L(aa^*(ab+a)^*)$.

$S \to aA$

$A \to S \mid B$

$B \to abB \mid aB \mid \lambda$

7. Find a regular grammar that generates the language on $\Sigma = \{a, b\}$ consisting of all strings with no more than two a's.

$$S \to aA \mid bS \mid \lambda$$

$$A \to aB \mid bA \mid bB \mid \lambda$$

$$B \to b \mid bB \mid \lambda$$
